

Lancaster district Climate Change People's Jury recommendations

The question considered by the Lancaster district Climate Change People's Jury was 'What do we need to do in our homes, neighbourhoods and district to respond to the emergency of climate change?'

Jury statement

can achieve.

The following statement was written by a group of jury members and then edited and discussed by the rest of the jury. All of the 26 jury members who voted on the recommendations either strongly support or support the statement:

'We are facing a climate emergency which makes us concerned and worried about the future.

We have heard from a range of experts and we now believe that if we take immediate action, we have the tools and the hope that we can address this emergency. We believe that the only suitable response will be one that brings many organisations and individuals together to work collectively and not separately. This is bigger than Lancaster. We recognise that many difficult decisions lie ahead but that we must act immediately and not allow a quest for perfection to get in the way of making progress. We need to take action today, not in 30 years time. A journey starts with a small step which all of us

The people of the Lancaster district need to see confident leadership, positive changes made and a clear plan for the future.

Our City and County Councils must accept that progressive change to fight the climate change emergency will have financial implications. Not being able to fund the recommendations we have listed here is no reason for inaction as money won't matter in a world that won't exist as we know it.

The response to the climate emergency needs to be one that moves away from politicians making all the decisions but instead reaches out to the wider public and communities for ideas of how to achieve our recommendations. It's time for our councils to listen to the people of Lancaster and district and take action now, leading the way to make changes in response to this emergency'.

Recomm	endations		
The recon	nmendations have been put into themes for the purposes of the small group		
	discussions	Votes	Rank
COMMUNICA	TIONS, EDUCATION AND COUNCIL LEADERSHIP	44	1st
1) Local s	schools must educate young people about climate change / emission		
reduct	ion:		
a)	Climate change must become part of the national curriculum, from reception upwards.		
b)	At least 1 teacher in each setting (inc. infants, juniors) accredited to teach climate change		
c)	Opportunities should be available for children and teachers to explore together the carbon footprint of their school and how to reduce it.		
d)	Basic skills taught weekly - food growing; seasonal, local foods, meal planning, preparation and storage; cooking from scratch, reducing waste;		
	make do and mend, repurposing and gaining a better understanding of where their food comes from (e.g. visits to farms) etc.		
e)	All schools having allotments which encourage bug houses/habitats		
	(insects or beehives or butterflies), growing pollinating plants and		
f)	composting and an area of water. Organising intergenerational community projects e.g. litter picking and		
.,	using junk to create something.		
Extend above	learning opportunities to further education providers and prisons.		
COMMUNICA	TIONS, EDUCATION AND COUNCIL LEADERSHIP	40	=2nd
2) The co	uncil should frame all of their work in the context of the climate		
emerg	ency, and act accordingly as it has done in response to COVID 19. There		
must b	be a stronger recognition of the problem at government level.		
	Climate change should be a permanent agenda item at every council meeting.		
b)	All councillors should take part in a climate change training programme so		
	they have the knowledge needed to address the issue.		
c)	We must ensure that action on climate change is not disrupted by party		
	politics. The council should investigate how we can ensure that action on		
	climate change happens irrespective of changes at elections. A long term		
	plan (initially for 10 years to 2030) should be agreed with cross party support to ensure continuity of action		
Δs a jury we fo	· · ·		
As a jury we feel people care about the climate change emergency but it seems many of those in power don't care enough (e.g. the new coal mine opening in Cumbria). We need			
-	fluential people in the way the jury have been educated - show them, don't		
tell them.	, and a second s		
			<u>'</u>

FOOD/	/FARMII	NG AND WASTE/RECYCLING	40	=2nd
3) Council to work with local partners to reduce waste from households and				
	businesses:			
	a)	Commit to zero single plastic use in any council premises e.g. schools, Salt		
		Ayre Leisure Centre (lead by example) and encourage local businesses to		
		do the same e.g. takeaways, encourage hotels /catering establishments,		
		to only use biodegradable waste bags, use wooden cutlery		
	b)	Support and promote reuse and encourage a make and mend approach -		
		i.e. a) promote and support Freecycle, Olio, Community Swaps. b)		
		establish a space at a local recycling depot for the public to reuse c)		
		encourage DIY stores to introduce a paint tin return facility.		
	c)	Promote and commission community leadership initiatives that		
		encourage the sharing of resources such as goods libraries e.g. tool pools,		
		toy libraries etc.		
	d)	Deliver community education initiatives for cooking, upcycling,		
		repurposing,		
	e)	Give households composting bins and make recycling easier for example		
		having one collection point or by enabling all recycling to be in one		
		household bin (like Cheshire West and East)		
	f)	Investigate and invest in local technology to turn methane from waste		
		into energy. This could be self-sustaining through selling the energy and		
		the by-product (compost).		
	g)	Ban all plastic bags with only reusable options available		
-		NG AND WASTE/RECYCLING	38	=4th
4)		uncil should fully support the sustainable food place partnership and sign		
	-	the global declaration i.e. the C40 Good Food Cities declaration which		
		es a range of commitments including ensuring that when governments or		
	•	public institutions directly purchase food that is served in schools, hospitals		
		ose meals must be healthy and sustainable and supporting an overall		
CON 40		se of healthy plant-based food consumption.	38	_ 4+ -
		TIONS, EDUCATION AND COUNCIL LEADERSHIP	38	=4th
) 3)		should be a strong campaign to convince people to take action - this		
		not be based upon shocking people into changing their ways, but instead be community led, regular, empowering, positive and focus on the		
		e effects of such changes on the community as well as climate, so giving		
	•	e some control back in our changing world. This should include visual		
		entations to show people what's happening and could happen in future		
	=	ding on what progress is made. Such a campaign should find ways for		
	=	nts to see the link with local flooding as a hook to encourage people to take		
	action.			
FOOD/		NG AND WASTE/RECYCLING	37	=6th
-		uce incentives to local producers and growers so that their produce is	0,	
		available and well promoted through:		
	•	free market stalls, grants/subsidies, free advertising, supermarkets having		
	,	a local produce aisle/section, a council website/app (which would allow		
		you for example to find your local milkman) etc.		
	b)	establish a "proper" market - which assembles all the local producers		
	,	under one roof to make it easier for people to buy locally in an affordable		
		and accessible way.		
	c)	Efforts should be made to enable people to buy from local producers and		
			1000000	

growers outside of 9-to-5 working hours.		
FOOD/FARMING AND WASTE/RECYCLING	37	=6th
7) Tackle food waste: One third of all food produced goes to waste. House	holds are	
responsible for around 53%. We should:		
a) Restart food waste collections for all local households. (Council t	to confirm	
the reason why this was stopped in the City Council area)		
b) Incentivise supermarkets and local food shops/outlets including	fast food	
takeaways to donate surplus food to customers/local food		
banks/community initiatives and reduce consumer waste by red	ucing	
special offers which encourages bulk buying of short shelf life go	ods.	
Encourage businesses to use existing systems like apps such as '	Гоо good	
to go' and Eggcup, the local business addressing food waste.		
c) Investigate ways that retailers can be made responsible for the o		
dumping the food waste they create so encouraging them to wa		
FOOD/FARMING AND WASTE/RECYCLING	36	=8th
8) Make it easier for people to grow their own food. Allotments and food	-	
spaces serve to both address climate change, promote sustainable living		
many other issues faced by our community i.e. growing as a tool for cor	•	
based improvements - social cohesion, mental and physical wellbeing as	s well as	
using allotment/growing to address food waste through composting.		
a) Conduct a survey/audit of land which is suitable for crops, veget		
fruit growing and for small mixed farms. Also identify land availa	ble for	
tree planting, hedge rows and wild meadows.		
b) The council should firstly, open more allotments and growing sp		
secondly raise awareness that residents can request more allotn		
 c) Additional land for allotments/community growing areas should identified and large private landowners encouraged or incentivis 		
release such land.	sed to	
HOUSING	36	=8th
9) All new housing must:	30	-5111
a) Have at least one of the following as a green energy supply, dire	ct to the	
property: a) Ground or air source heat pump or b) solar panels. I		
should be constructed so they are suitable for solar panels		
b) have adequate drainage so there is no additional flood risk		
c) have hedges instead of fences (e.g. Halton co-housing) and gree	n spaces	
d) Be built to A/B energy performance rating.	•	
e) Be constructed with more sustainable materials		
f) Any developer building new homes in the area should pay towar	ds the	
retrofit of existing local properties, allocated for example, by a c	ommunity	
lottery (a target could be applied to this to ensure consistent inv	=	
across developers).		
g) Green belt development should be avoided. Any houses built or	າ green	
belt must be passive house standard.		
TRANSPORT	35	10th
10) We must make it easier for people to not use cars:		
a) Make it easier to cycle: a) set up a simple to use, easy access ebi		
electric scooter rental scheme (including the University) b) provi	de more	
places to lock your bike c) the provision of a network of clearly		
demarcated, safe cycle lanes d) Encourage cyclists to use high vi	s clothing,	
lights, helmets.		

b) Encourage people to walk: make pavements wider, smoother and more		
accessible. Experiment with dropped kerbs that mean the pavement/road		
transition is less defined, so making the town more pedestrian friendly.	_	
COMMUNICATIONS, EDUCATION AND COUNCIL LEADERSHIP	34	=11th
11) Lancaster City Council need to invest in good quality messaging and marketing		
using a range of mediums to promote:		
a) The reality and urgency of the climate emergencyb) Information on food planning, batch cooking, eating seasonally, reducing		
waste		
c) Recycling and composting		
Council to regularly publish statistics on the amount of a) household materials recycled		
b) recycled materials from households sent to landfill c) sent abroad to be 'recycled' (and		
to which country). A council committee should be accountable and responsible for acting		
on these findings		
COMMUNICATIONS, EDUCATION AND COUNCIL LEADERSHIP	34	=11th
12) Lancaster Council should commit to a yearly climate emergency action event		
such as a festival to educate the public about their role in reducing the carbon		
footprint and share messages around sustainability, whilst promoting local and		
ethical producers, sellers and community initiatives as well as celebrate the		
achievements in reducing emissions year on year. Such an event could be		
combined with an existing event/s/festival/s to be a fun and informal way for		
people to learn about all aspects of climate change. Ideas for the event include:		
food from local producers/farmers, sustainable drinks, stalls for companies,		
competitions for the best revamped outfit or piece of furniture, best community		
project, best grown vegetable, retrofitting initiatives etc.

Council should report to them	33	=14th

deliverables and b) a source of advice and support. The Council reporting to the implementation steering group should be based upon key milestones and the identification of key individuals who hold responsibility for ensuring actions are completed		
HOUSING	33	=14th
16) The Council should expand on existing plans (e.g. solar farms) to prioritise and invest in green energy sector industry and employment and encourage and incentivise (e.g. through planning) others to do so.		
HOUSING	32	=17th
17) The council should design and deliver a process to ensure that every house in Lancaster and district is assessed for energy performance , whether rented or privately owned. The assessment process should include information and advice about what can be done to improve the energy performance of the house and signpost where people can go for financial and/or technical or other support in order to make improvements. The council should investigate what incentives would best encourage people to take up this offer and make improvements e.g. reclaim VAT on the cost of materials, lower energy bills.		
TRANSPORT	32	=17th
 18) We must make it as easy as possible for people to take up the use of electric vehicles. The infrastructure must be in place so that as the cost of cars comes down people can switch easily: a) Subsidise members of the public / residents of a street to fit their own EV charging points. b) Encouraging businesses and other large employers that have car parks at their places of work to install charging points. c) Offering free licenses/reduced taxes to taxi companies using electric or hybrid vehicles. d) Once a public bus has been decommissioned it should be replaced by an 		
electric bus.		
COMMUNICATIONS, EDUCATION AND COUNCIL LEADERSHIP	31	19th
19) Pensions and fossil fuel investments. The jury recommends that the Council should inform its pension stakeholders about the link between pension investments, fossil fuels and climate change and run a consultation with options as follows a) Do nothing b) Divest c) Use the influence with companies with fossil fuel investments to promote strategies to mitigate climate change This consultation process would give pension fund trustees a mandate to make change based on stakeholder feedback. The jury would like all organisations represented on the Climate Change Jury Oversight Panel to do the same (e.g. Lancaster University) and encourage other local businesses to take similar action		
TRANSPORT etc	30	20th
 20) We must increase the local population's digital literacy and access to technology and equipment so that we make the digital world accessible and encourage more flexible and home working so reducing emissions from transport caused by journeys to work. Covid has started to make this possible we need to make sure it continues a) The Council should take steps itself and support businesses to promote 		

		1
working from home/flexible working. As a People's Jury we have		
demonstrated how easy it is to run meetings remotely for most occasions		
b) Widely available lessons on how to use zoom / virtual meetings, the use of		
devices, connecting to the internet. A team of volunteer tutors (like Silver		
Surfers in the library) could visit people in their homes		
c) A laptop rental scheme		
COMMUNICATIONS, EDUCATION AND COUNCIL LEADERSHIP	29	21st
21) The council needs to invest in an Education Centre that is open to all, accessible		
(in terms of cost, physical access and transport) linked with the Eden project that		
educates adults and children about food production; drivers of climate change,		
possible solutions and shares the learning of the citizen's jury. It must be fun. The		
power station had a similar learning centre, this could be done through the		
network of libraries and collections and be offered online too.		
TRANSPORT	27	=22nd
22) We must make it easier for people to use public transport through an adequate ,		
regular bus service.		
a) There should be a commissioned piece of research reviewing levels of bus		
use at peak times and analysing how to reduce traffic in the centre of		
Lancaster and how this links with the current provision of public transport		
(buses and trains). Prior to COVID buses were always too full which		
discouraged many to use the bus, this must be addressed. This research		
should consider the possibility of non privatised council run services on		
busier routes.		
b) All buses should be free for students, children and over 60s		
c) We need an integrated travel system, that is coordinated (for trains, buses		
and e bike hire), fare capped and uses a one ticket system, like Transport		
for London (a Shrimp Card?) We recognise the logistics for this would be		
very complicated, so the sooner this is looked at the better.		
FOOD/FARMING AND WASTE/RECYCLING	27	=22nd
23) Create a working group made up of people that can influence change,		
encouraging mutual responsibility, shared vision & mutual action towards carbon		
neutral farms.		
This working group could include local producers, farmers, representatives of existing		
groups such as the NFU, Soil Association, academics, climate change campaign groups,		
large corporates (e.g. supermarkets).		
FOOD/FARMING AND WASTE/RECYCLING	23	24th
24) At present the subscription fee for the garden waste collection service is £40, this		
should be reduced.		
FOOD/FARMING AND WASTE/RECYCLING	17	25th
25) The Council should introduce a local Green Reward scheme , where individuals		
earn points to exchange for discounts on goods or services by reducing their		
carbon footprint. For example by demonstrating using a renewable energy		
supplier, reducing yearly mileage (proven by MOT certificate), electric car charge		
points. Points to be redeemed at local businesses and services therefore		
reinvesting in the local economy.		1
